Request continuation of TA Status for an additional year. This well has previously been in TA status which expired in October 2009. On December 3 an MIT test was performed which was witnessed by Richard Inge. The original chart was retained by the NMOCD. The well was found to be mechanically sound. We are holding this well for a drill deeper to the Morrow when it is economic for us to do so. The well bore sketch on file with the OCD is still accurate. A packer is set @ 10,206. 2-7/8 13Cr tubing is in the well.
