13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleting horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

ConocoPhillips Company provides the following information to change the TA procedure of the above referenced well.

COP set at CIBP and cement cap at 6390', with squeezed perforations at 5840'. An MIT was attempted 01/18/2010 and the well was pressured to 550 psi and the well leaked off 300 psi in 5 min. It is suspected that the squeezed perforations are not holding pressure. In an attempt to TA this well COP requests to set a CIBP within 50 feet of the top perforation and cap that with 35' of cement on top.

Verbal Approval was recieved 01/19/2010 by Roger Hall, BLM.
