13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

1. POOH w/tbg.
2. PU work string.
3. RIH w/pkr and RBP to test csg and find possible csg leak.
4. If located, determine squeeze treatment and squeeze as necessary to repair leak.
5. Cleanout to 9550'.
6. RIH and evaluate wolfcamp perfs.
7. Perf and stimulate additional wolfcamp as necessary, put on production.

RE: Plug back and Recomplete NOI – Conditions of Approval

There is to be no surface disturbance beyond the existing pad. A closed loop system is to be used. H2S monitoring and protection equipment is to be on site.

3M BOP is to be used for this well.

Submit subsequent report and well tests once work is completed. New completion report isn't needed.

DHW 021810
