13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

SandRidge intends to clean out and acidize the current perforations (3431-3843) in this well as per the attached

DSS

GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area or regional procedures and practices, are either shown below, will be issued by or may be obtained from the local Federal office.

SPECIFIC INSTRUCTIONS

Item 4 - Locations on Federal or Indian land should be described in accordance with Federal requirements. Consult the local Federal office for specific instructions.

Item 13 - Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by the local Federal office. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to the top of any tubing left in the hole; method of closing top of well and date well site conditioned for final inspection looking for approval of the abandonment.

NOTICES

The Privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. 396; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is used to: (1) Evaluate, when appropriate, approve applications, and report completion of subsequent well operations, on a Federal or Indian lease; and (2) document for administrative use, information for the management, disposal and use of National Resource lands and resources, such as: (a) evaluating the equipment and procedures to be used during a proposed subsequent well operation and reviewing the completed well operations for compliance with the approved plan; (b) requesting and granting approval to perform those actions covered by 43 CFR 3162.3-2, 3162.3-3, and 3162.3-4; (c) reporting the beginning or resumption of production, as required by 43 CFR 3162.4-1(c) and (d) analyzing future applications to drill or modify operations in light of data obtained and methods used.

ROUTINE USES: Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions in connection with congressional inquiries or to consumer reporting agencies to facilitate collection of debts owed the Government.

EFFECT OF NOT PROVIDING THE INFORMATION: Filing of this notice and report and disclosure of the information is mandatory for those subsequent well operations specified in 43 CFR 3162.3-2, 3162.3-3, 3162.3-4.

The Paperwork Reduction Act of 1995 requires us to inform you that:

The BLM collects this information to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

Response to this request is mandatory.

The BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collection unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT: Public reporting burden for this form is estimated to average 8 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management (1004-0137), Bureau Information Collection Clearance Officer (WO-630), 1849 C St., N.W., Mail Stop 401 LS, Washington, D.C. 20240

Skelly Unit #283 30-015-29227

Clean out & Acidize Current Perforations

Procedure:

Well off not pumping.

- 1) MIRU WSU.
- 2) Pull rods & pump.
- 3) ND WH and NU BOP
- 4) Release TAC & Pull tubing.
- 5) Pick up and run in with notched collar on tubing to PBD (3948').
- 6) Pull tubing and notched collar.
- 7) If fill is encountered, proceed. If no fill skip to Step No. 14.
- 8) Rig up Reverse Unit.
- 9) Pick up 4 3/4" bit, 6 - 3 1/2" Drill Collars, and Crossover.
- 10) Run in to top of fill and clean out to PBD.
- 11) Circulate hole clean
- 12) Pull and lay down tools.
- 13) Rig down reverse unit.
- 14) Pick up Treating Packer and RBP on tubing.
- 15) Hydro Test tubing in hole.
- 16) Run in and set RBP below 3843'.
- 17) Pull up and land packer above 3681'
- 18) Rig up Acid Company with 4000 gallons 15% NEFE Anti-Sludge Hydrochloric Acid containing H₂S scavenger for 5000 ppm H₂S + 1% MiCellar Solvent by volume. Will need approximately 1500# Graded Rock Salt and 30 bbls 10# Brine for Blocks.
- 19) Spot acid to end of tubing and set packer.

Discovering Beneath | Exploring Beyond™

- 20) Acidize perms 3681 – 3843 with 2000 gallons in 2 equal stages and flush to bottom perf.
- 21) Flow back until well dies.
- 22) Release packer and retrieve bridge plug.
- 23) Pull up and set RBP @ 3650'
- 24) Pull up and land packer @ +/- 3350
- 25) Acidize perms 3431 - 3586 with 2000 gallons in 2 equal stages and flush to bottom perf.
- 26) Flow back until well dies.
- 27) Release packer & run in hole.
- 28) Latch and release RBP,
- 29) Run RBP below 3843 and set.
- 30) Pull up and set packer @ 3350
- 31) Swab back remaining load
- 32) Release packer.
- 33) Run in hole and latch and release RBP.
- 34) Pull tubing and lay down tools.
- 35) Pick up and run pumping bottom hole assembly.
- 36) Run rods and pump.
- 37) Test well until stabilized and perform scale squeeze.
