Thank You,  
And if it were much more than 50 feet, we would have looked at it harder....

FYI – I spoke with Ms. Starkey concerning this matter. I advised her that as long as it is in the same pool, a sundry notice including the depths of the perf's would be acceptable for this issue.

Will:

It in the same formation. I left Darold a message so hopefully he can direct me in this matter. Thank you for your response and help.

Hello Mary:

Normally if there is a change in formation name or in the depth interval, a new C-108 is required.

Is this 20 foot deeper still in the same formation(s) as named in the permit? If a new formation name is involved, we would need to look it over again.

If the formation name(s) are the same, then 20 feet deeper would likely not be a problem. I only draft these permits after reviewing the applications, our district folks are the ones enforcing the permits and rules.

If Darold Gray, Jacqui Reeves, and Randy Dade are OK with this one, it is likely OK.  
Normally, they would need to sign off on a "sundry" form – you could ask them.

Will:

In our Orders we received from NMOCD for the above mentioned SWD we were given gross perf intervals of 8540'-9400'. We would like permission to go down to 9420' with our perfs. Hopefully a letter to you stating this request will suffice. Could you please direct me as to how to proceed to remedy this situation? I greatly appreciate your efforts in this matter.

Sincerely,

*Mary Carter Starkey*
