13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work and approximate duration thereof. If the proposal deepens directionally or recompletes horizontally, give subsurface location and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new

**Devon Energy Production Company L.P. respectfully requests to do the following changes:** The surface casing will be set using an Ashston Oilfield Services rig. The rig plat is attached.

This rig will be used only to set the surface casing and will leave the location once the surface casing has been run and cemented. McVay #8 will drill the remainder of the wellbore. The reasons for using the smaller rig to set surface are: rig availability and economics.

The BLM will be contacted 24 hours prior to commencing drilling operations. The surface casing will be run cemented back to surface as per the approved APD. The well will be secured with a flanged wellhead that will have a flanged cap secured on top of the wellhead. McVay #8 will be on location to drill the remainder of the wellbore within 60 days after the Ashton rig has left the location.

Attachment

*Operator to contact BLM prior to releasing rig or INC will be issued.  
Also must call when moving McVay #8 on location.*

14. I hereby certify that the foregoing is true and correct
