Describe Cause of Problem and Remedial Action Taken.*													
Connection between fiberglass tank and Murphy switch split. Vacuum truck called. Describe Area Affected and Cleanup Action Taken.*													
An approximate area of 20' X 30', all within bermed and lined battery area. All produced water recovered, repairs made. Depth to Ground Water: 50 -													
99' (approximately 70', Section 22, T24S-R27E, New Mexico Office of the State Engineer), Wellhead Protection Area: No, Distance to Surface													
Water Body: > 1000', SITE RANKING IS 10. Based on all released produced water recovered, battery is bermed/lined and liner is intact, Yates Petroleum Corporation requests closure.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and													
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger													
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability													
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health													
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
