Type of Release: Produced water contained within firewall.	Volume of Release: Approx. 200 bbls.	Volume Recovered: Approx. 200 bbls
Source of Release: Charge pump seal fatigued.	Date and Hour of Occurrence: Unknown but within 24 hours	Date and Hour of Discovery: 13 October 2010 Approx. 0800 Hrs.
Was Immediate Notice Given? X Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher	
By Whom? Cheryl Winkler	Date and Hour: Message @ Approximately 0930 Hrs	
Was a Watercourse Reached? <input type="checkbox"/> Yes X No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.* N/A		

RECEIVED

OCT 26 2010

NMOCD ARTESIA

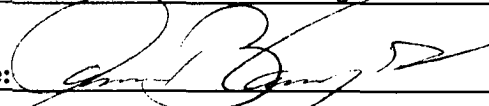

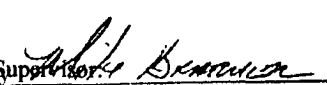

Describe Cause of Problem and Remedial Action Taken.*

Charge pump seal fatigued discharging produced water within the SWD lined battery firewalls. NMOCD was notified.

Describe Area Affected and Cleanup Action Taken.*

Vacuum trucks were employed to suck up the standing liquid within the lined battery firewalls and replacing it into the system. Since the discharge was completely contained no CAP or FRR was produced due to the defined nature of the event. The seal was repaired and the unit put back into operation. The BLM was also on location at this time to deal with an unauthorized discharge. BLM investigated the situation and agreed with the procedure. No produced water left the containment area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
