BTA completed surface reclamation as follows:

11/18/2010

The pit site was overlaid with clean soil from a nearby source. A seed mixture designed by the BLM was broadcast as per the BLM instructions. The seed was pressed into the soil using mechanical methods. A D-5 Caterpillar dozer was utilized to press the seed into the soil. The D-5 was run perpendicular to the slope of the topography, to keep the soil from eroding and to keep the seed in place during times of precipitation. Ms. Terry Gregston, BLM Carlsbad, was notified of project completion.

12/14/2010

Terry Gregston, BLM Carlsbad, met on site with Skip Baca, BTA, for a final field inspection. Ms. Gregston stated that the location is "in good shape and a high level of remediation work had been completed". The location is in monitoring status to follow revegetation progress.

Copy of approved 3160-5 is attached.
