Describe Cause of Problem and Remedial Action Taken.*

The flow line froze and ruptured. The well was shut in and a backhoe crew was called to the release area.

Describe Area Affected and Cleanup Action Taken.*

An approximate area of 20' X 40'. The affected area is approximately 0.35 miles northeast of the well pad (just off of the lease road). The flow line was repaired; no oil was recovered. Impacted soils were excavated and taken to an NMOC approved facility. Depth to Ground Water: >100' (approximately 184'). Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on amounts of oil released, all impacted soils removed and depth to ground water/site ranking, Yates Petroleum Corporation requests closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
