13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Read & Stevens proposes to plug and abandon the subject well by setting a CIBP at 1,870' over the existing perforations of 1,890'-1,906', and capping with 35' of cement. The 5 1/2" casing will then be cut and pulled from the free point estimated at 1,222' from a calculated top of cement. A 100' cement plug will be set at the 5 1/2" casing stub. A 100' cement plug will be set at the shoe of the 8 5/8" casing at 292', and a 50' surface plug will be set after cutting off the wellhead.
