(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Artesia, New Mexico, September 10, 1962

Right Federal

Well No. 6 is located 1200 ft. from N line and 1900 ft. from E line of sec. 6

30N 12E (1/4 Sec. and Sec. No.) 17 (Twp.) 10 East (Range) N.M.P.M. (Meridian)

Southern Lake (Field) 17 (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3600 ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location to a depth of approximately 1,500 feet to test through the limestone sand of the Artesia formation.

We will run approximately 600 feet of 5 1/2" surface casing and cement with 50 sacks. We expect to run approximately 1,500 feet of 7" casing as a water string, pulling cement when the oil string is run. We will run an oil string of either 5 1/2" or 4 1/2", cemented with 100 or 125 sacks of cement, perforate the sections as determined by the electric log and complete the well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Kinsaid & Arsen Drilling Co.
