(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Premier Oil & Gas, Inc., requests approval to continue the temporary abandonment status of this well, We are currently studying Devon's drilling pattern and completion work in this area and wish to hold this well for future potential. Also, an axis change in the waterflood program may be necessary in the near future to recover additional secondary reserves. And the shallower 7-Rivers Zone is behind the casing in this well.

Attached is a copy of the pressure chart from the casing integrity test which the OCD witnessed on this well September 28, 1995.
