7. Describe Proposed or Completed Operations (Clearly state all pertinent details, including pertinent data on all operations performed) SEE RULE 1103.

The above well was drilled in 1938, and the Bradenhead between the 9 5/8" casing and the 7" casing has a bull plug welded in on one side and a 3x2" swedge welded in on the other side. The threads on the swedge have been corroded off in this 5' cement lined cellar. Oil and Gas fumes in cellar.

Propose to insert a 1" nipple in the swedge, with and 1 nipple and valve at surface.

~~Will cement around this bradenhead and 1" pipe.~~

This well will then be ready for scheduled survey.

I hereby certify that the information above is true and complete.
