A cable tool rig was moved onto the location and the well spudded on July 21, 1974. A 15-inch hole was drilled to 215 feet when a decision was made to plug and abandon. Verbal permission was received from the Artesia office to plug and abandon. A 50 sack plug was displaced from 160 to 215 feet and another 50 sack plug placed between 60 to 110 feet. A 25 sack plug was placed at the surface of the hole. The rig was released on August 3, 1974. We will advise when the location has been cleared for inspection.
