RE: Administrative Order No. SWD-395
State "D" Com No. 1
N, Sec 16-T20S-R24E
Eddy County, New Mexico

Gentlemen:

The referenced Administrative Order SWD-395 was approved July 31, 1990 authorizing disposal injection into the Devonian formation from "approximately 10,000 feet to approximately 11,250 feet through 2 7/8-inch plastic-lined tubing set in a packer located at approximately 9950 feet." As we discussed, it is requested to amend the order to approve injection from the perforated interval from 9723 feet to 11052 feet into the Devonian formation (Devonian top at 9721) through 2 7/8-inch plastic lined tubing set in a packer located at 9655 feet. These changes are necessary since the well was deepened after the application to inject was submitted and now reflect actual depths.

We appreciate your cooperation in this matter and ask that this request be expedited if possible. If you need further information please let me know.

Sincerely yours,

Paul Ragsdale
