Re: Harvard Exploration & Development
Corporation #1 Mobil Federal Com.
1980' FSL & 1960' FWL Section 7
T-20-S, R-25-E, Eddy County, New Mexico

Dear Mr. Ames:

In regard to our recent meeting in the field and subsequent phone call concerning the captioned well location, this letter requests your approval for Harvard Exploration & Development Corporation to build a six inch caliche pad over your four inch lateral gas line and right-of-way which runs East-West fifty feet north of our staked location. The enclosed location plat and equipment diagram shows the location of your line in relation to our proposed pad and rig set-up. There will be no fixtures or equipment, permanent or temporary, located over your gas line. Also the reserve pits will be located on the south end of the pad, over a hundred feet from the line. We understand the gas line is buried approximately three feet below the surface so we will not excavate over the line. We propose to keep the area open for any pipeline work that personnel of Natural Gas Pipeline Company of America need to perform.

If this is agreeable with you please sign one copy of the letter, returning it to us at the above address. Thank you.

Very truly yours,

William J. LeMay
Vice President

WJLeM/ja
Encl.

APPROVAL GRANTED:

Natural Gas Pipeline Company of America
