Well No. 7 is located 1650 ft. from Section line and 1650 ft. from East line of sec. 6
(Township) 33 S. 6 30 S. 27 E. N.M.P.M.
(Range) (Meridian)
Mc Millan Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We intend to drill a well approximately 750 feet to test the Queen producing formation. Size of hole 8 5/8 inch to approximately 450 feet to set 7 inch O. D. pipe on packer to shut-off water and produce well if oil is encountered. After such time as well is produced long enough to determine if well is going to hold up 7 inch casing will be cemented or pulled and 5 1/2 inch pipe cemented.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
