Re: Packer Leakage Test  
Lowe State Gas Com #1

Dear Mr. Brown:

We have received your letter dated January 31, 1986 advising us as to the status of the subject well. Even though this well is presently shut in, a packer leakage test must still be run to show segregation between the two zones.

This test should be run as soon as possible and this office notified in time to witness the test.

If you have any questions concerning this matter, please feel free to contact me at this office.

Sincerely,

A handwritten signature in cursive script that reads "Mike Williams".

Mike Williams  
Oil & Gas Inspector
