13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Chevron is the operator of this well for Oryx Energy Company in the Bogle Flats Unit. Oryx proposes to install a rental compressor on the subject well site to increase the gas production, however, Chevron will operate the compressor for Oryx after installation. This rental compressor will be powered by a 300-350 horsepower internal combustion engine. The packaged unit will also be mounted on a structural steel skid surrounded by an ecology basin to contain fluid leaks and minimize environmental damage. It will be located on the existing well site and will not require additional surface disturbance.
