Department: Operations/Midland

Subject: Fort "7" Com. #1  
Sec. 7-24S-29E  
Eddy County, New Mexico  
Malaga (Atoka) Field  
(EOG 96% WI)

Date: March 2, 1987

The installation of our pipeline for the subject well began today. The necessary paperwork for laying this line to the Texaco, Malaga Harroun "6" #1 was filed on January 8, 1987, and verbal approval was received on February 26, 1987. It is taking an inordinate amount of time for the BLM to process permits.

The BLM has not received a permit request from El Paso to set the meter run for this well. We ended up waiting on El Paso several weeks after laying our line to the Owen Mesa "25" #1. Your conversations with El Paso were instrumental in getting them off high-center at that time.

Would you please contact the appropriate person with El Paso, so that they might have a meter set by the time our line is installed? This is the sixth well in our New Mexico, Parker Program, and we would like to get it on line as soon as possible

If you need anything more please give us a call. Thanks.

PLEASE NOTE:  
IT APPEARS THAT EL PASO  
WAS FILING FOR THE OFF-LEASE  
METER APPROVAL ON BEHALF  
OF HNG/ENRON (OPERATOR) OF  
FORT 7 Com #1 well. BUT  
THIS APPROVAL IS ABSENT FROM  
HALLWOOD (CURRENT OPERATOR)
