

INFORMATION RECORD—Continued[illegible]

HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator must identify the problem and the scope of the investigation.

2. The second step is the collection of data. This is done by the investigator who is responsible for the investigation. The investigator must collect data from the sources available to him.

3. The third step is the analysis of the data. This is done by the investigator who is responsible for the investigation. The investigator must analyze the data and draw conclusions from it.

4. The fourth step is the presentation of the results. This is done by the investigator who is responsible for the investigation. The investigator must present the results of the investigation in a clear and concise manner.

5. The fifth step is the evaluation of the results. This is done by the investigator who is responsible for the investigation. The investigator must evaluate the results of the investigation and determine if they are satisfactory.

6. The sixth step is the conclusion. This is done by the investigator who is responsible for the investigation. The investigator must draw a conclusion from the results of the investigation.

7. The seventh step is the recommendation. This is done by the investigator who is responsible for the investigation. The investigator must recommend a course of action based on the results of the investigation.

8. The eighth step is the implementation of the recommendation. This is done by the investigator who is responsible for the investigation. The investigator must implement the recommendation and monitor the results.

9. The ninth step is the evaluation of the implementation. This is done by the investigator who is responsible for the investigation. The investigator must evaluate the implementation of the recommendation and determine if it is satisfactory.

10. The tenth step is the conclusion. This is done by the investigator who is responsible for the investigation. The investigator must draw a conclusion from the results of the investigation.
