The elevation of the derrick floor above sea level is ..... ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Intend to drill w/cable tools to approx 3000', will drill 12-1/2" hole to 250' and at that point run 10-3/4" and mud. If water is encountered 8-5/8" will be run. Will drill approximately 3000' and if oil is encountered in paying quantities, 5-1/2" or 4-1/2" casing will be run and cemented above all salt and water sands Ford Chapman Contr.
