7. Summary of Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The above well was spudded on August 9, 1972 at 11:00 a.m. An eleven inch hole was drilled to 760 feet which was approximately 230 feet into the Delaware formation. 8-5/8" 24#/ft. casing was run to total depth and cemented with 325 sacks cement and an estimated 30 sacks circulated. After W.O.C. 24 hours the double ram blow-out preventor and Hydril Blow-Out preventors were nipped up and the casing tested to 1000 psi and held OK. A 7-7/8" hole was drilled to a total depth of 7100 feet and 5-1/2" casing of 14#/ft & 15.5#/ft was run to total depth and cemented with 300 sacks Class C cement w/8# salt per sack and 3/4 of 1% CFA-2. The production string was tested to 3000 psi and held OK. Completion attempt will be made in the Morrow Sand.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
