Re: M Dodd B Deep Fed #2
30-015-31041

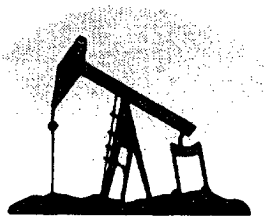

Diana:

The test performed on July 1, 2004 was a MIT (Casing integrity test) not a bradenhead test. I was unable to perform a test of the bradenhead since it was not plumbed to the surface, therefore was not visible. I informed the company representative on location that the cellar **must** be dug out and the bradenhead plumbed to a position above the surface of the location so it may be tested and monitored. This was the reason for the violation (copy attached).

Please advise me 48 hours prior to the date you are ready for re-inspection. This date must be prior to placing the well on injection.

Sincerely,

Gerry Guye

Gerry:

In response to your letter of July 1, 2004 (copy attached), regarding the inspection on the above referenced well, the bradenhead test was performed and witnessed by you on July 1, 2004. I have enclosed a copy of the sundry notice and chart that I submitted on July 2, 2004. If you have any questions, or require further information, please don't hesitate to contact me.

Sincerely,

Diana J. Cannon
Production Analyst
