Downhole Commingle Allocation

The subject well was downhole commingled effective March 12, 2003. By Administrative Order DHC-3016, we are obligated to consult with your office on the fixed allocation of production from each of the commingled zones.

Due to the extreme marginal nature of this well (25 MCFPD) we are requesting the allocations be fixed as was recommended in the original application to downhole commingle this well. Those percentages by pool follow:

Dagger Draw Upper Penn, South	20%
Indian Basin Strawn, North	40%
Wildcat (Atoka)	40%

Please contact Carl Brown or me if you have any questions concerning these percentages.

Yours truly,

Jimmy D. Carlile
