13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103.  
For Multiple Completions: Attach wellbore diagram or proposed completion or recompletion. If a pit or below-grade tank is involved in the operation, complete the reverse side of this form.

Devon Energy Production Co., LP respectfully requests approval to dowlhole commingle the Red Lake Queen-Grayburg-San Andres (51300) and the Northeast Red Lake-Glorieta Yeso (96836) pursuant to 19.15.5.303 ( C ) 3 (b) Exceptions for wells located in preapproved pools or areas.

This pool was pre-approved by Division order PC-1108.

The San Andres is perforated at 1896-2367' and the Yeso is perforated from 2992-3201'.

Average production from the SA is 66 oil and 60 mcf gas. Average production from the Yeso is 45 oil and 70 mcf gas.

The allocation method is by ratio of stabilized production. For the Yeso, oil is 40.5% and gas is 53.8%.

For the San Andres formation, oil is 59.5% and gas is 46.2%.

Commingleing these two pools will not reduce the value of the total remaining production and the ownership between the two pools is identical.

The BLM has been notified of this filing.
