Section 26	Township 20S	Range 24E	Qtr/Qtr SENE	N/S Footage 1980 FNL	E/W Footage 810 FEL
Latitude _____	Longitude _____	Metes and Bounds _____			

28. Describe Proposed or Completed Operation

Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all markers and zones. Attach the Bond under which the work will be performed or provide the Bond Number on file pertinent with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

Yates Petroleum Corporation plans to plugback and recomplete this well as follows: Set a CIBP at 6517' with 35' cement on top. Perforate Bone Springs 5758'-5778' (80), 5790'-5800' (40) and 5842'-5852' (40). Stimulate as needed. Swab test and evaluate. Either set an RBP or CIBP at 5710'. Perforate Yeso 5581', 5585'-5587', 5609'-5628' for a total of 25 holes. Stimulate as needed. Consider commingling Bone Springs and Yeso.

I hereby certify that the foregoing is true and correct.
