If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* A valve malfunctioned causing 3 barrels of oil and 12 barrels of produced water to be released. The facility was shut-in, the valve repaired and put back into service. A vacuum truck was immediately called to the location and 3 barrels of oil and 5 barrels of produced water was recovered. Talon/LPE was contracted to perform an initial site assessment and soil sampling.

Describe Area Affected and Cleanup Action Taken.* Talon/LPE mobilized personnel mobilized conduct and initial site assessment and soil sampling. Upon receipt of lab data from the initial sampling activities and air rotary drilling rig was used to vertically delineate the site. The impacted area was excavated to depth varying from 0.5-feet 3-feet bgs. Upon receipt of clean confirmation samples the excavated area was backfilled and contoured to match the surrounding terrain.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
