NATURE OF RELEASE

| | | |
|--|---|---|
| Type of Release: Crude Oil | Volume of Release: 10 bbl | Volume Recovered: 0 bbl |
| Source of Release: Malfunction of dump valve at separator | Date and Hour of Occurrence: 12-05-2012, 3:00PM | Date and Hour of Discovery: 12-06-2012, 10:30AM |
| Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required | If YES, To Whom? Geoffrey Leking (OCD District 1) | |
| By Whom? Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | Date and Hour: If YES, Volume Impacting the Watercourse: | |

If a Watercourse was Impacted, Describe Fully *

Describe Cause of Problem and Remedial Action Taken. *Initial C-141 states - lost pressure to separator dump and liquid went through the flare, spraying the pasture west of location. Dump valve will be adjusted.

Describe Area Affected and Cleanup Action Taken. * Initial C-141 states - oil sprayed an area in pasture approx. 100 yards x 150 yards. Spot mopped the most impacted area with absorbent pads. Bio-remediated in place the entire affected area with approx. 1,500 gallons of 4% Microblaze/Water mixture. This method was approved by BLM and soil samples will be taken to ensure proper levels of TPH are reached. On October 4, 2016, SDR personnel applied Gator8 bioremediation amendment to the spill and tilled the soil. On December 30, 2016 and January 17, 2017, LAI personnel collected confirmation samples (SS-1 through SS-10) which were analyzed for TPH (GRO, DRO and ORO) and BTEX. The laboratory reported BTEX and TPH below the RRAL. EOG requests no further action for 2RP-1486. The remediation area will be seeded with BLM seed blend No. 2.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
