Subject: RE: South Culebra Bluff 13 Fed Well No 4, Inspection iTM1734233912

Rebecca,

This location is technically in a National Flood Hazard Zone and is high priority as far as clean-up is involved. The depth to groundwater is extremely shallow in this area (10-30'). Due to the sensitive nature at this location, an extension will likely not be an option.

Please make sure all wells are addressed with respect to the staining issues. Please remove the stained soil and replace with clean soil. Take a picture after the stained soil has been replaced with clean soil. Send in a letter and picture for each well in the "Inspection Detail Section" explaining that the violation has been addressed and we will administrate the violation has been taken care.

Thank you,

Subject: [EXT] South Culebra Bluff 13 Fed Well No 4, Inspection iTM1734233912

Mr. Hamlet,

Please find attached a Site Deferral Request regarding inspection number iTM1734233912, conducted in 2017. This inspection identified a staining violation. Chevron acquired the lease for this well in October 2018 and is planning to plug and abandon this well. The attached letter requests approval to address the violation in conjunction with P&A activities at this well.

Please let us know if you have questions.

Best Regards,
