13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BOPCO, L.P. respectfully requests the changes listed below to be approved for the above captioned well.

Given the PLU #333H is inside Secretary Potash and outside R-111 Potash areas, BOPCO is requesting to change the planned two stage cement job to a one stage cement job on the second intermediate casing string. This will negate the use of a DV Tool. Computer modeling provided by the cement company based on inputs provided BOPCO L.P. suggest high probability of success at circulating cement 500' into the 9-5/8" casing shoe. TOC will be confirmed with a temperature survey after the cement job, and a CBL log prior to beginning the completion process.

Cementing:

Pre Flush: 100 bbls of Super Flush 102

Lead: 375 sks Tuned Light Cement + .75lb/sk CFR-3, 1.5lb/sk Salt, +.25lb/sk Poly-E-Flake, (10.2 ppg, 2.7ft3/sk, 12.19 gal/sk)

Tail: 100 sks HalCem-H (15.6 ppg, 1.19 ft3/sk, 5.39 gal/sk)
