- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletable in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BOPCO, L.P. respectfully requests the changes listed below to be approved for the above captioned well.

Given the PLU #330H is ^{inside} the Secretary's and R-111 Potash areas, BOPCO, L.P. request to change the planned two stage cement job to 1 stage on the second intermediate casing string. This will negate the use of a DV Tool. Computer modeling provided by the cementing company based on inputs provided by BOPCO, L.P. suggest high probability of success at circulating cement 500' into the 9-5/8" casing shoe. TOC will be confirmed with a temperature survey after the cement job. Updated volumes are listed below.

Flush: 100 bbls of fresh water

Lead: 330 sks Tuned light Cement, + 0.75lb/sk CFR-3, + 1.5 lb/sk Salt, + 0.25 lb/sk Poly-E-Flake (10.2 ppg, 2.7 ft/sk, 12.19 gal/sk)

Tail: 275 sks HalCem - H (15.6 ppg, 1.19 ft/sk, 5.39 gal/sk)

Due to lead cement yield - operator shall WOC for lead cement to reach 500 psi compressive strength or 24 hours, whichever is greater.
