13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

LINN respectfully requests an extension for the reactivation of this well. LINN is in the process of seeking the appropriate regulatory approvals that are needed to convert this well to a Seven Rivers/Grayburg injector. Currently, this well is only injecting into the Grayburg Jackson formation; however, LINN proposes to add the Seven Rivers zone as an injection interval. LINN will salvage this wellbore by installing and cementing 4" flush joint casing from surface to the top of the Seven Rivers zone. LINN will then perforate the Seven Rivers and inject into the Seven Rivers/Grayburg Jackson (current injection interval). Since this lease is not unitized, LINN will be filing the appropriate paperwork to ensure that these zones can be commingled; therefore, LINN respectfully requests an extension that is sufficient to allow for LINN to secure confirmation that the Seven Rivers and Grayburg Jackson zones can be commingled.
