If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

At the Apache 25 #6, a flow line coming off the water leg had a hole in the riser on the heater treater causing a 100 barrel leak of produced water.

Describe Area Affected and Cleanup Action Taken.*

At the Apache 25 #6, a flow line came off the water leg had a hole in the riser on the heater treater causing a 100 barrel leak of produced water. When the production operator arrived at battery, he found the produced water inside the containment. He immediately turned off pumping wells and contacted a vacuum truck to recover all 100 barrels. The riser was then replaced with new pipe and put back into production.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
