BASHER	Sources at Yates Petroleum Corporation have relayed information to me that they believe there will not be enough H2S found from the surface through the Wolfcamp formation to meet the OCD's minimum requirements for the submission of a contingency plan per Rule 118.	5/27/2005
BASHER	Any pit or below-grade tank has been or will be constructed or closed according to NMOCD guidelines with approved general permit on file. The pits will have a synthetic liner with a 12 mil. thickness and a volume of 20,000 bbls.	5/27/2005
BASHER	A 3000# BOPE will be installed on the 9 5/8" casing and tested daily.	5/27/2005
BASHER	The State Engineers Web Site has been accessed for the captioned well. The depth to ground water is approximately 453', the distance from the nearest fresh water well is approximately 1.8 miles and the distance from the nearest surface water is approximately 1600'. With this information obtained from the web site the Site Ranking for this well is 0 points. With this ranking score deep trench burial and capping will take place at pit closure.	5/27/2005
