Attn: Ms. Norvella Adams

**Re: Devon Energy Production Company: Burton Flat Deep Unit # 43, located in Unit P  
(990' FSL & 660' FEL, Surface Location) of Section 3, Township 21 South, Range 27  
East, Eddy County, New Mexico, NMPM**

Dear Ms. Adams or To Whom It may Concern:

In regards to the above captioned well, the New Mexico Oil Conservation Division (NMOCD) cannot approve your application "Request for Allowable and Authorization to Transport" (Form C-104).

The reason being is that this location falls within the boundaries of the Burton Flat; Strawn Gas Pool, which has special pool rules as created by R-Order 4707, Case # 5112.

In part, the special rules and regulations of the Burton Flat; Strawn Gas Pool reads in part under Rule 2:

"Each well shall be located no nearer than 1980 feet to the end boundary nor nearer than 660 feet to the side boundary of the proration unit nor nearer than 330 feet to any governmental quarter-quarter section line".

Through my research today, I cannot find any amendments. This would be rescinding the special pool rules of the Burton Flat; Strawn Gas Pool, which is listed in R.W. Byram & Co. books or any reference of this R-order on NMOCD's web site.

Unless there has been an amendment to this R-order, for this well to produce Devon Energy Production Company, LP must have an approval for a non-standard location.

For your convenience, I will fax to you the R-Order that set the special rules and regulations for your review.

Please call our office if you have any questions regarding this matter.

Respectfully yours,

Bryan G. Arrant
