The original plan was to set the 9-5/8" casing at 3980' with cement circulated to surface.
The proposed new plan is to set the 9-5/8" casing at approximately 4,000' and set an External Casing Packer (ECP) inside the 13-3/8" casing with a DV tool (stage collar) set above the ECP as close to the ECP as mechanically possible. We will circulate the cement to surface.
