Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

**RECEIVED**  
NOV 14 2012  
NMOCD ARTESIA

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A vacuum truck driver from Basic Energy Services was backing up to a load line when he hit it and caused it to separate from the tank. 285 bbls of produced water spilled rapidly into containment with 285 bbls recovered.

Describe Area Affected and Cleanup Action Taken.\*

The 285 bbl spill occurred at the Dickens 29 Fed 3H location. Vacuum trucks were called to clean it up and the line was repaired to resume service.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
