1. Lime Rock Resources has contracted Talon/LPE to reclaim the closed drilling pit at the West Red Lake No. 32, a P&A location.
2. On 1/10/2013 Talon/LPE mobilized personnel to the site to carry out soil sampling activities for the construction of a work plan. Grab soil samples were collected from the closed drilling pit. The soil samples were sent to Cardinal Laboratories for analysis of total Chlorides via Method SM4500Cl-B. The results for the soil samples are attached.
3. New soil will be transported to the location from a local borrow pit. A minimum of 1-foot of caliche will be placed over the closed drilling pit and 2-foot new top soil will be placed over the closed drilling pit area. The soil lift will be contoured to match the surrounding terrain.
4. Windrows will be installed to divert run off waters for erosion control. The drilling pit will be seeded using the recommended BLM seed mixture for the area.
