Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\* Produced fluids exited location and flowed into Little Water Draw, an ephemeral water course that runs only during precipitous events.

Describe Cause of Problem and Remedial Action Taken.\*

The lever control valve plugged on the 2 phase separator causing a release of 120 barrels of produce water inside the earthen berm of the separators. A vac truck was immediately called to the location and recovered 115 barrels. Talon/I.P.E was contacted to complete the site assessment. Soil samples from the impacted area were collected to determine appropriate clean up actions.

Describe Area Affected and Cleanup Action Taken.\* The area impacted was inside of the earthen berm surrounding the separators. Analytical testing was complete and attached, along with a site map for the area. The impacted area is under is under the Recommended Remedial Action Levels (RRAL). No further actions are required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
