APPLICATION FOR EXCEPTION TO NO-FLARE RULE 19.15.18.12

(See Rule 19.15.18.12 NMAC and Rule 19.15.7.37 NMAC)

- A. Applicant Murchison Oil & Gas, Inc.,
whose address is 1100 Mira Vista Blvd., Plano, TX 75093,
hereby requests an exception to Rule 19.15.18.12 for day or until
December 24, 2013, for the following described tank battery (or LACT):
Name of Lease: Grizzly Bear State Com 2H (30-015-40042) Name of Pool: Empire; Glorieta-Yeso
Location of Battery: Unit Letter I Section 1 Township 17S Range 28E
Number of wells producing into battery 1
- B. Based upon oil production of 28 barrels per day, the estimated * volume
of gas to be flared is 54 MCF; Value \$216 per day.
- C. Name and location of nearest gas gathering facility: Well currently connected to DCP's Artesia Plant
- D. Distance: N/A Estimated cost of connection: Well connected to pipeline
- E. This exception is requested for the following reasons: DCP plant shut down for maintenance on 12/18/13.

OPERATOR I hereby certify that the rules and regulations of the Oil Conservation Division have been complied with and that the information given above is true and complete to the best of my knowledge and belief. Signature <u><i>Michael S. Daugherty</i></u> Printed Name & Title <u>Michael S. Daugherty, EVP & COO</u> Email Address <u>mdaugherty@jdmii.com</u> Date <u>12/16/2013</u> Telephone No. <u>972-931-0700</u>	OIL CONSERVATION DIVISION Approved Until <u>Dec 31, 2013</u> By <u><i>ADado</i></u> Title <u>Dist # Supervisor</u> Date <u>12/17/2013</u>

December 9, 2013

TO ALL GAS PRODUCERS BEHIND LOCO HILLS GATHERING:

**RE: Notice of Planned Maintenance
Wednesday, December 18, 2013
Eddy County New Mexico**

Dear Producer:

On Wednesday, December 18, 2013, DCP will commence work to install louvers on compressor coolers and to install a new inlet separator at the Loco Hills Booster. We anticipate this maintenance will last approximately 24 hours.

The meters on the attached list will be curtailed to approximately 20% of usual production during this work. Producers have the flexibility of choosing which meters to shut in so long as they do not exceed the total allocation for these meters. Please shut in your meters by **5:00 p.m. MST on Tuesday, December 17, 2013.**

The DCP field teams coordinating the work are:
Danny Forlines (575-802-5148)

DCP Operations personnel will coordinate with your field representatives the shut-ins and return to service for each affected Delivery Point to ensure the safety of local operations of all companies and the community. **For both safety and environmental reasons, DCP will not be able to flare gas at the boosters, and all gas flows identified for curtailment must be shut-in as requested.**

We thank you for your cooperation and regret any burden this scheduled maintenance places on you and your operations. Please recognize that this work is necessary and, in the longer term, helps DCP Midstream to provide you with reliable service. If you have additional questions, please contact Curt Alexander (432-620-5428) or myself at the number below.

Sincerely,

CONDITIONS OF APPROVAL for FLARING or VENTING GAS

1. Venting gas is absolutely not allowed.
2. Prior to flaring gas, C-129 must be filed & approved. Blanket approval cannot be given for this operation.
3. Flared volumes of gas are to be metered & reported.
4. Flares WILL be manned at all times. Brush should be cut down to 1 or 2 inches around flare stack at least a radial distance of 2 times the height of the flare stack.
5. Flares WILL NOT be left unattended.
6. No flaring operations to be conducted during red-flag days.
<http://www.gacc.nifc.gov/swcc> (go to "Predictive Services" on SWCC website) to check for red flag warnings.
7. Follow safe practices for flaring guidelines.
8. Permit may be rescinded at any time by NMOCD.
9. If well is able to be connected to a gas gathering system, it will be done so as soon as possible.
10. **Flaring of gas is prohibited.** The State Forester grants an exception to the prohibition on open fires for the flaring of natural gas when the following conditions are met. Unless flaring is needed for safety purposes, flaring pursuant to this exception shall not be done on days that are "red flag days" as determined by the National Weather Service or on days when the sustained wind is in excess of 25 miles per hour in the area.
- 11.1. The day is not a "red flag day" as determined by the National Weather Service and the sustained wind is not in excess of 25 miles per hour in the area.

- 12.2. The local fire department and county dispatch are notified at least 24 hours in advance of anticipated releases that will result in flaring. If flaring is done by an automated system then the schedule of flaring shall be provided to the local fire department and county dispatch. The area is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of one and one half times the height of the stack.

- 13.3. At least one adult is on site with communications equipment adequate to reach county dispatch and the local fire department in the event of a fire. The individual should also be equipped with a shovel and a water backpack pump or other equipment to deliver water to suppress a fire.

- 14.4. If flaring is to take place at an unmanned facility, then the area around the flare stack is mowed and maintained at a length not to exceed 4 inches and all other flammable products or debris shall be cleared in the area for a distance of three times the height of the stack.

Notice to Oil and Gas Facilities and Operators Flaring Gas in New Mexico

SANTA FE, NM – The Oil Conservation Division (OCD) encourages all oil and gas facilities with flare stacks and well operators that are flaring gas to upgrade their *Fire Awareness Programs* this year. New Mexico State Forestry reports that 460 fires have burned 25,475 acres on state and private land in calendar year 2012.

Forecasts remain dismal this spring with fewer chances for normal precipitation, particularly in southwestern New Mexico and southeastern Arizona. Temperatures could also be higher than normal.

Open flames and gas flares should be monitored carefully and oil and gas operators should create a defensible space to help prevent wildfires. Defensible Space is the area around a structure where combustible vegetation that can spread fire has been cleared, reduced or replaced. This space acts as a barrier between a structure and an advancing wildfire.

During the course of the upcoming fire season, it may become necessary for New Mexico State Forestry to issue fire restriction on State and private land. Log on to www.nmforestry.com for updates or call your local district office.

New Mexico State Forestry offers the following guidelines for establishing effective defensible space:

- Create a "Lean, Clean and Green" firebreak area by removing flammable vegetation and growth within 30 feet of each structure. Single trees and shrubs may be retained if they are well spaced, pruned and placed so they avoid the spread of fire. Maintain an irrigation system for any vegetation near structures.
- Keep grass and weeds mowed.
- Prune lower tree limbs to at least 6 feet up to 15 feet (or lower 1/3 of branches on smaller trees).
- Remove vegetation and debris around propane tanks.

For the latest fire weather information please visit USDA Forest Service website:
