13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Permian Limited Partnership respectfully requests to install a permanent LACT with a 2" Micro Motion Coriolis Meter located at the Federal 23-11. Oxy has built a tank battery with separation equipment and the oil is being currently transferred to the Federal 23-1 CTB. All fluid is being allocated back to the Fed 23-11 well. This 2" LACT Unit is being installed as a preventive measure incase the oil will need to be trucked off of the location IF the pipeline has issues and cannot take delivery at the 23-1. This will keep Oxy from shutting in the well. If this occurs, Oxy will truck the oil and have the transportation company issue a run ticket. These barrels will then be combined with the run ticket from the Fed 23-1 and allocated back to the Fed 23-11 for revenue accounting purposes. Please see below for additional details.
2" Flow Meter max rate 400 bbl/hr Serial # 14257828
CMF300M355NRAUEZZZ
2" Micro Motion Elite Sensor 316SS, 3" 150#
