**NMOCD ARTESIA**

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The flow line developed a leak at a collar connection. The well was shut in, a vacuum truck was used to pull the fluid out of the line and pick up the free standing fluid. The section of pipe was scheduled to be replaced on 12/17/13.

Describe Area Affected and Cleanup Action Taken.\*

The spill impacted approximately 1,950 square feet of pasture, a crew was dispatched to the site to gather information for one-call clearance and BLM arch. Clearance. A crew started removing the heavily saturated soil at 9a.m. 12/18/13 after receiving permission from the BLM to access the site. The spill will be cleaned up in accordance to the NMOCD and BLM guidelines for spill remediation.

Approximately 1,460 cu. yds of impacted soil was excavated from an area measuring approximately 14' to 40' in width, 120' in length, and 1' to 14' in depth. Impacted soil was hauled to an NMOCD-approved disposal facility. **Please reference the attached Remediation Summary and Site Closure Request for detail of Remediation Activities.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
