**Describe Cause of Problem and Remedial Action Taken.\***  
Water tanks on location ran over and spilled into the lined containment surrounding the water tanks. The answering service never received an alarm, therefore the lease operator never received an alert about the overflow. It is suspected the issue was a result of bad weather as storms had passed through recently. Issues regarding the alarm system are being researched.

**Describe Area Affected and Cleanup Action Taken.\***  
The 30BBLS of produced water that spilled from the water tank all spilled into lined containment. All 30BBLS were recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
