NATURE OF RELEASE

Type of Release: produced water	Volume of Release: 58 bbls	Volume Recovered: 53 bbls
Source of Release: injection station	Date and Hour of Occurrence: 6/14/14 @ am	Date and Hour of Discovery: 6/14/14 @ am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher	
By Whom? Brian Criswell	Date and Hour: 6/14/14 @ am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse: Not Applicable	

Depth to Water. ~25 ft bgs

If a Watercourse was Impacted, Describe Fully. \* Not Applicable

Describe Cause of Problem and Remedial Action Taken. \* Approximately 58 bbls of produced water were released when the pump equipment failed at the battery releasing 58 barrels of produced water to the secondary containment; no produced water escaped the containment. A vacuum truck was dispatched to pick up any free standing liquids. There were approximately 53 bbls recovered. An Emergency Response Team arrived at the release area and began continuous abatement of the impacted area. Visibly stained soil was excavated and hauled away for disposal at a state approved facility.

Describe Area Affected and Cleanup Action Taken. \* Approximately 2,300 square feet of surface area was impacted by the release. Soil samples will not be collected from release area due to finding a poly liner while removing contaminated soil. All contaminated soil will be removed and hauled for disposal. Upon NMOCD approval, EPI will backfill the tank battery.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
