If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Dump on separation equipment hung open sending high volume of gas and fluid to production tank causing tank to run over. Upon pumper arrival well was shut-in at the well head to stop the release.

Describe Area Affected and Cleanup Action Taken.\*

Affected area- Inside metal secondary containment (2-4in. standing fluid). 100 ft by 120 ft area affected outside containment in-between pumping unit and tanks. 300 ft by 200ft area of pasture south of well pad was affected by oil mist and will be micro blazed. Produced water and oil was sucked out by vacuum truck (about 80 barrels recovered) and put back into water tank. Steamer will clean tanks, cat walk, separation equipment, and secondary containment. The contaminated soil outside the containment will be dug out and hauled off. Final remediation will be conducted in accordance with the NMOCD's Guidelines for Remediation of Spills, Leaks and Releases.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
