13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Scope of work per Notice of Written Order:

RE: #14DW021W

Old Drilling Pit will be reclaimed with additional soils (materials used will be from pad down size, if a better grade of topsoil is needed native/like soils will be brought in). Material will then be capped on top of old pit area and contoured to grade of surrounding area (1 ft of caliche with 2 ft of native/like soil on top of caliche). Impacted soils will be excavated and hauled to an approved facility. Excavated soils south of the well head will be back filled with existing material from pad down size. The pad will be down sized to accommodate the use of a pulling unit. The old flow line will be removed to a location east of the existing access road.

**Additional data for EC transaction #259134 that would not fit on the form**

**32. Additional remarks, continued**

Yates would like to request that pad material from downsize be stock piled in the cut area NE of well head for reclamation when well is plugged.

Work to be completed 90 days after BLM approves Sundry.
