If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
The stuffing box packing failed due to high pressure on the flow line. The wellhead is equipped with an E-pot, the float switch in the E-pot shut down the well however the gas pressure continued to blow oil and water out of the failed packing. The stuffing box packing was replaced.

Describe Area Affected and Cleanup Action Taken.*
The release impacted approximately 3,525 sq.ft of caliche well pad. The fluid soaked into the ground. Due to the heavy rains in the area a portion of the impacted area was also rain water.
The spill area was left as is to reveal the stained area. Basin Environmental will remediate the area.
The impacted area will be cleaned up in accordance to the NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
