13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Burnett spudded the Gissler A 48 on 9/19/14. We ran it down to 4,000' and then ran directional tools to steer the well to our proposed BHL of 1650' FSL, 1650' FWL, SEC 14, Unit K, T17S, R30E.

On 9/24/14, we discovered that the well had walked 80' North and 10' West. Our proposed BHL is 130' South and 20' East from our surface location.

We do not have enough remaining depth to reasonably turn the well back inside our hard lines before topping the productive Pool, so we propose to set a cement plug up to +/-3,400' and kick off from there to our original proposed BHL. We will be using 225 sxs of Class H cement.

Verbal to start work was given by Jennifer Mason on 9/24/14. Subsequent will be filed upon completion of work.
